

A FAIR INCOME TAX

A Fair Income Tax bill would ensure that all Marylanders are contributing their fair share to our state's budget. It will also mitigate the increasing concentration of wealth and power in a few hands, and lower barriers that hold too many Marylanders back economically.

The most effective way to make our revenue system more equitable:

- Restructure our tax brackets
- Reduce taxes for working families
- Ask more of the wealthy who today contribute less as a share of their income than the rest of us do

Fair income tax reform will bring major benefits to Maryland:

- Working families will see their tax responsibilities go down
- The wealthy few will contribute more; middle-income households will generally see only modest impacts.

THE FAIR INCOME TAX BILL WOULD RAISE AT LEAST **\$600 MILLION PER YEAR**

Impact of Fair Income Tax Reform

Average tax decrease or increase – as a % of household income
